CRYSTAL DESIGN COMPANY

Golf Accessories

Approx. 2.2 billion golf tees are used in the United States every year.

VS TEE's are extremely environmentally friendly.

The high performance Koviss TEE head is made of urethane. Urethane is a unique material that offers the elasticity of rubber combined with the toughness and durability of metal. Compare to plastics, urethane offers superior impact resistance, while offering excellent wear properties and elastic memory. Urethane has also an outstanding resistance to general weather conditions.

MEET THE PROSPRING TEE

R&A **USGA.** Conforming

Thanks to an incredibly durable urethane head and unparalleled break-away technology, Koviss spring and magnet TEES reduce resistance, improve accuracy and add distance to your drive. What's more, they last an average of 18 rounds of golf.

We dare your wooden tees to last the front nine.

VS TEES conform to the rules of golf of USGA and R&A.

GROUND LEVEL —————

URETHANE HEAD

We don't expect you to know urethane's formula, but do know the unbreakable head allows for less friction. If you are strong enough to break this golf tee, it won't be the urethane part. Thank you, science.

ANCHOR BANDS

The anchors on the ProSpring provide firm and consistent placement in the ground, so you get an even shot every time you swing. Oh, and these anchors—well, they anchor.

NYLON CORD

The nylon cord allows the tee 360-degree rotation. The super-strong cord is made of tightly wound nylon fibers and is durable enough to handle 18 rounds of golf.

SPRING LOADED

The spring lets your tee relax when you swing, allowing for a cleaner follow through. The flex makes for a weightless connection with the ball. Now you can relax a little more too.

VS TEE Pro

The spring allows the tee to topple over as your driver passes, resulting in less resistance and a smoother follow-through adding up to 10 yards of distance to your drive.

- Obtained Korea Good Design Award
- Patent in USA, EU, Japan, China, Korea
- Conforms with **USGA / R&A Rules**

Made of extremely durable urethane and nylon, the Pro-Spring-TEE lasts an average of 18 rounds. No other tees can say that.

Two anchor bands help keep the tee in the ground and assist in finding that perfect height every time.

The cup of this tee offers incredibly low friction, giving you more control and the illusion of a ball that's conveniently hovering in place.

One Pro-Spring TEE replaces upwards of 500 wooden tees, the up shot of which is less clutter in the bag & on the tee box.

VS TEES - the world's first spring loaded golf tee with 360 degree rotation is designed to work with drivers and woods, a durable, low resistance tee. Get ahead of the competition with this incredibly smooth, consistent tee

This durable tee gets out of your club head's way at the point of contact for a cleaner follow through.

Attached VS TEE's keeps the tee from being lost off of the tee box.

No more estimating how high
teeing up golf balls,
no more improper tee depth.
The 5 different TEE heights enables
golfers to have more confidence
with their Tee shots, to
consistently tee the ball at the
same height and to control the
height of their tee shots.

The VS TEE lasts an average of 18 rounds. This durable tee gets out of your club head's way at the point of contact for a cleaner follow through.

The ParThree or xS TEE attached to VS TEEs keeps the tee from being lost. This durable construction lets you put your ball on the green time and time again.

Designed to double, it acts as IRON TEE or as an anchor when tethered to one of the other Koviss TEE's. This little "monster" is sure to see lots of action.

TT TEE Magnet TEE

The MagTee lasts an average of 18 rounds, making it an economical choice over wooden tees.

This durable tee gets out of your club head's way at the point of contact for a cleaner follow through.

The head and the base are pulled together with a powerful magnet and connected with a urethane hinge. Get ahead of the competition with this incredibly smooth, consistent tee.

Driving Range Support

The "anti-stress" TEEs

Koviss TEE's can be used effectively by all golfers being able to correctly set the depth of the tee, regardless of the type of golf swing they employ and golfers will be able to consistently hit more favorable tee shots with the easy to use, functional and brightly colored TEE's.

TRACK PUTTING MAT

Golfers are always looking to improve and constantly seeking the ultimate practice aide.

The most revolutionary products to hit the golf improvement market in the last years, is probably this first class TRACK PUTTING MAT. Practice your putting skills and improve putting experience with this two way, four speed professional putting surface.

This great tracing putting green is designed to simulate different playing conditions, running at Stimpeters: 12.5, 10.5, 10.2 & 8.0 feet for a realistic authentic feeling.

The TRACK PUTTING MAT features the only path memory surface of its kind.

Determine the putt line on the putting green, concentrate on your putting technique and focus on the back of the ball. After the putt you can check the trace the ball traveled on the putting mat.

Practice alignment, straight line putting, practice breaking putts by creating slopes with a newspaper and always see the clearly visible results of the played golf ball. Sweep with the enclosed eraser over the practice mat to wipe off the paths.

This quality mat with an anti skid backing has a size of 300 x 50 cm. It can be set up in just a minute & stored easily.

This TRACK PUTTING MAT is dedicated to sharpen putting skills and build confidence, indoors or outdoor and makes also a great gift for any golfer or corporate event. It will give years of fun and practice at home, office or other venues to improve the putting game.

The value of a single putt is equal to a longest drive.
