

## Press Release

### THE HIGH PRECISION VS TEE OF KOVISS GOLF is R&A conform The European Representation is in Switzerland

....the insider tip between golfers to improve the handicap is now R&A as well as USGA rules of golf conform.

The VS Tee is the world's first spring loaded golf tee with many advantages:

There is no resistance at impact due to the high flexibility of the VS Tee head made of urethane, a strong but elastic material. There is no loss of energy during your vital swing. A smooth clean hit, straighter & accurate shots are the results and as a consequence the golfer will increase distance.

For a stable tee off, the head of a VS TEE is 27% larger compare to a traditional tee. VS Tees are available in 4 sizes to profit each time you tee up of the optimum tee height. The cord linked VS Tees, also as anchor to use, prevent from losing them, not only a great pleasure for golfers but also for green keepers and a contribution of Koviss Sport to the environment.

Koviss Golf products known as economical due to high quality material, unit an innovative and advanced high level technology with an extraordinary design and are unique in its kind.

The VS Tee is a real profit for all golfers developed and produced by an enthusiastic golfer.
